

# 4X DIN PLAN OBJECTIVE, N.A. 0.10

Model: G380-2301

Enhance your microscopic observations with the G380-2301 40X DIN Semi-Plan objective, designed for use with G380 series microscopes. This objective provides 40x magnification and a numerical aperture (N.A.) of 0.65 for detailed viewing. The retractable front lens protects the lens element from damage during slide changes and handling. The semi-plan design offers improved image flatness compared to standard achromat objectives, resulting in sharper focus across more of the field of view.
