The G502T Trinocular Microscope is designed to deliver high-quality imaging for advanced research, educational, and laboratory applications. Featuring a Seidentopf trinocular head, this microscope provides a trinocular viewing port that allows for simultaneous viewing through the eyepieces and the option to connect a camera for image capture, making it ideal for documentation and digital analysis. The microscope comes equipped with paired 10x eyepieces, ensuring comfortable and strain-free viewing over long periods.

This model includes a set of achromatic objectives (4x, 10x, 40x, and 100x), offering clear and detailed imaging with minimal chromatic aberrations. Whether examining biological specimens or preparing samples for documentation, the G502T provides excellent clarity at various magnifications. The mechanical stage offers smooth and precise specimen movement, enhancing usability and allowing for easy, reproducible focus adjustments.

The Köhler illumination system powered by LED technology provides bright, even lighting, ensuring optimal contrast and clarity for accurate sample observation. The intensity adjustment feature allows you to fine-tune the brightness according to your specimen and application, providing flexibility for a wide variety of viewing conditions.

With a wide voltage range (90V-240V), the G502T Trinocular Microscope is compatible with global power sources, making it perfect for use in labs and research facilities around the world. Its combination of excellent optics, versatile lighting, and trinocular head for digital imaging makes the G502T a top choice for those requiring high-quality imaging and multimedia capabilities.
