- BUILT-IN MECHANICAL STAGE WITH ABBE NA1.25 CONDENSER & IRIS
- HALOGEN ILLUMINATION

The IP730PL Binocular Microscope is a robust and versatile instrument designed for a wide range of applications in education, laboratories, and routine microscopy, now featuring enhanced optical performance. It boasts a comfortable binocular viewing head with WF10X wide-field eyepieces, providing clear and comfortable observation. The key upgrade in this model is the set of DIN standard Plan achromatic objectives (4X, 10X, 40X, and 100X oil immersion). These Plan objectives provide significantly improved image flatness across the entire field of view compared to standard achromatic objectives, resulting in sharper, more accurate images, especially at the edges. The 100X objective is designed for use with immersion oil to achieve the highest resolution. Illumination is provided by a powerful 6V 20W halogen lamp with intensity control, allowing users to adjust the brightness for optimal contrast and visibility. This microscope offers a notable improvement in optical quality, making it a valuable tool for detailed observation and analysis.
