

Infinity Microscope

Model: IP750PL

- SEIDENTOPF BINOCULAR HEAD
- WF10X PAIRED EYEPIECES
- 4X, 10X, 40XR, 100XR DIN INFINITY PLAN ACHROMAT OBJECTIVES
- BUILT-IN MECHANICAL STAGE WITH ABBE NA1.25 CONDENSER & IRIS
- LED ILLUMINATION

The IP750 Infinity Binocular Microscope is a high-performance instrument designed for demanding applications in laboratories, research facilities, and advanced educational settings. It offers exceptional image quality and versatility thanks to its advanced infinity optical system. The comfortable binocular viewing head with wide-field WF10X eyepieces provides comfortable observation and a wide field of view. A key upgrade in this model is the set of Infinity Plan objectives (4X, 10X, 40X, and 100X oil immersion). These Plan objectives provide significantly improved image flatness across the entire field of view compared to standard achromatic objectives, resulting in sharper, more accurate images, especially at the edges. The 100X objective is designed for use with immersion oil to achieve the highest resolution. Illumination is provided by a powerful LED with intensity control, allowing users to adjust the brightness for optimal contrast and visibility. This microscope is a powerful and versatile tool suitable for detailed microscopic observation, analysis, and demanding applications where superior optical performance is essential
